

These projects showcase a broad spectrum of applications, from e-commerce platforms to social networking sites, demonstrating a wide range of full-stack capabilities.

1. E-Commerce Platform (2011)

- **Tech Stack:** Laravel, PHP, MySQL, jQuery
- **Features:** Integrated payment gateway, custom product catalog, user authentication, and an admin panel for inventory management.

2. Online Reservation System (2012)

- **Tech Stack:** Laravel, PHP, AngularJS, MySQL
- **Features:** Booking engine, calendar integration for availability, customer management, and automated notifications.

3. Social Networking Site for Artists (2013)

- **Tech Stack:** Laravel, VueJS, PHP, MongoDB
- **Features:** User profiles, media upload capabilities, an interactive gallery, and a real-time chat module.

4. Real Estate Listing Website (2014)

- **Tech Stack:** Laravel, ReactJS, PHP, MySQL
- **Features:** Property listings with advanced search filters, Google Maps integration, agent profiles, and contact forms.

5. Educational Course Platform (2015)

- **Tech Stack:** Laravel, AngularJS, PHP, MySQL
- **Features:** Course management, video content streaming, quizzes, and certification upon completion.

6. Project Management Tool (2016)

- **Tech Stack:** Laravel, VueJS, PHP, MongoDB
- **Features:** Task assignments, progress tracking, file sharing, and collaborative tools.

7. Health and Wellness Appointment Portal (2017)

- **Tech Stack:** Laravel, ReactJS, PHP, MySQL
- **Features:** Appointment scheduling, service catalog, health tips blog, and user feedback system.

8. Custom CRM for Small Businesses (2018)

- **Tech Stack:** Laravel, AngularJS, PHP, MySQL
- **Features:** Lead tracking, email campaigns, sales pipeline visualization, and analytics dashboard.

9. Subscription-Based Meal Plan Service (2019)

- **Tech Stack:** Laravel, VueJS, PHP, MongoDB
- **Features:** Subscription management, meal customization, nutritional information, and delivery scheduling.

10. Event Planning and Ticketing Platform (2020)

- **Tech Stack:** Laravel, ReactJS, PHP, MySQL
- **Features:** Event creation, ticket sales, attendee management, and real-time updates.

11. Freelance Marketplace (2021)

- **Tech Stack:** Laravel, AngularJS, PHP, MongoDB
- **Features:** Profile creation, project bidding, payment gateway, and review system.

12. Fitness Tracker Application (2022)

- **Tech Stack:** Laravel, VueJS, PHP, MySQL
- **Features:** Activity logging, goal setting, progress charts, and social sharing.

13. Online Auction Site (2023)

- **Tech Stack:** Laravel, ReactJS, PHP, MongoDB
- **Features:** Live auction functionality, bid management, user ratings, and secure payment processing.

14. Digital Asset Management System (2024)

- **Tech Stack:** Laravel, AngularJS, PHP, MySQL
- **Features:** File storage, tagging, advanced search, and access controls.

15. Collaborative Research Platform (Present)

- **Tech Stack:** Laravel, VueJS, ReactJS, PHP, MongoDB, MySQL

- **Features:** Document collaboration, project management tools, data visualization, and user forums.

Each project illustrates a progressive enhancement in technology use and complexity, reflecting an evolving mastery over the Laravel framework and associated full-stack development tools. These projects demonstrate the ability to deliver comprehensive, user-friendly, and scalable solutions across a variety of domains.

*I also provide single shot development, short term development, long term development and ongoing support **AND** a deferred payment or equalized payment plan. Just ask about this as well.*
